DANCING WITH THE GODS
KENT NERBURN

What is Paprika Inside?

Paprika Inside grants restaurants visitors a great and unique experience when visiting a restaurant.
Visitors can order and track their dishes using their smart phones or using tables.

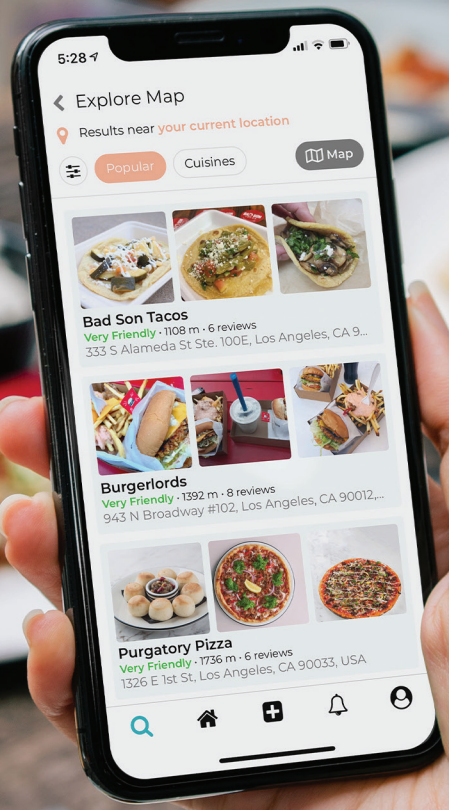

Why Paprika Inside?

Visitors will be able to view menus more easily with images, descriptions, and prices. Moreover, they can see the order status and call a waiter using a smart phone.
Visitors also can view/request an invoice.

Tables Management

Paprika Inside helps restaurants to manage sections and tables inside the restaurant.
It allows managers to divide the restaurant into sections and each section has its tables and waiters.

Kitchen Management

Kitchen staff can update order status very easily to notify customers about their orders. Visitors can tell how much time it will take for orders to be ready.

Point of Sale

Paprika Inside has a portal to make things easier for cashier to open and manage customers' orders in the restaurant.
Cashiers can open tables, manage orders, issue receipts, and handle payments.

Taxes and Discounts
Paprika Inside helps restaurants' managers to manage different types of taxes and add different discounts to different customers
